

AGRICULTURE IN MONTANA SCHOOLS

Treasure Chest Inventory
Updated September, 2007

This is an inventory of the teacher aid materials that are in the AMS Green Treasure Chest which is located in the school library. Teachers are not restricted in the use of these materials. All materials are free to be copied for use by educators. Laminate posters, where possible, to lengthen the useable life of items. Please mention AMS when ordering from any of these companies for your own replacement or additions. If your school is missing any of these items, please contact your local AMS representative, or me. New teacher aid material is added to the chest from time to time, thus, this inventory list is updated periodically.

If you need additional information, please contact:
